PROFESSIONAL PROFILE

Computer Engineering graduate from Tecnológico de Monterrey with Honors, specializing in software development, cybersecurity, robotics, and artificial intelligence. Passionate about building innovative technology solutions that create meaningful impact. Experienced in leading multidisciplinary engineering teams and developing AI-driven applications through academic, research, and industry projects. Finalist in the University Rover Challenge with proven leadership, project management, and software development experience. Seeking opportunities to contribute technical expertise to innovative engineering and software projects.

EDUCATION

Tecnológico de Monterrey

B.S. in Computer Engineering | GPA: 97.7/100 | Honors

2022 - 2026

California State University, Fullerton – United States

Fall 2025

Study Abroad Program focused on Cybersecurity and AI classes

Certificate in Transforming to Transcend (CBC)

2024

PROFESSIONAL EXPERIENCE

NDS Cognitive Labs | KeySpotting

Project Manager & Software Developer

Spring 2025

- Led project planning and coordinated development milestones, ensuring on-time delivery of 10 weeks and successful completion of project objectives making a functional, ready to use software.
- Developed an AI-powered trend research and reporting system using Node.js, TypeScript, HTML, and CSS.

González Chevez y Cia. S.C.

Software Developer

November 2024 – January 2025

- Developed and integrated an AI-powered chatbot into the company's WordPress website using ChatGPT-based extensions to automate customer communication.

Fundación Todas Brillamos | Zazil App

Mobile Application Developer

Fall 2024

- Developed an Android application in Android Studio to support online sales, implementing secure payment processing through PayPal. Enabling the foundation to reach more people than just their community.

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Quantum Robotics

Student Team Leader

2023 - 2025

- Led a multidisciplinary team of 9 leaders and over 60 active multidisciplinary members, guiding the team to the University Rover Challenge (URC) Finals in 2024 using Ubuntu and ROS.
- Guided the team to the University Rover Challenge (URC) Finals (2024) by developing a competition-ready rover
- Collaborated with the finance team to secure sponsorships from organizations including MAXON, Altium, and Sony, helping fund two competition seasons.

Robotics Software Developer

2022 - 2023

- Programmed the rover's robotic arm using inverse kinematics and developed a web-based control interface, using Ubuntu, Python and ROS. Helping the team achieve a Top 10 finish at the URC Finals in 2023.

Hackathons Oct – Nov 2024

- **Banorte Hackathon (2024):** Developed an AI data-processing pipeline capable of extracting and cleaning information from TXT, PNG, DOCX, XLS/XLSX, CSV, and PDF files for local AI models.
- **HackMX (2024):** Developed the Android front-end for a mobile application designed to manage inventory and operations during a 24-hour sprint.

TECHNICAL SKILLS

Programming Languages: Python (Advanced), C++, JavaScript, TypeScript, C#, Kotlin, SQL

Frameworks & Technologies: Node.js, Flask, HTML, CSS, SQL, Git, AWS, Android Studio

AI & Robotics: Artificial Intelligence Assistants, ROS, Ubuntu, Robotics Software Development

Tools: Microsoft Office, Windows, Linux (Ubuntu)

Languages: Spanish (Native), English (C1 – IELTS 7.5, December 2024)
